Rarely seen, world-class museum artifacts and technological breakthroughs in virtual reality give visitors unparalleled access to one of the new 7 wonders of the world: Machu Picchu.

Artifacts on loan from Peruvian museums *Museo Larco* and *Museo de Sitio Manuel Chávez Ballón* won't be in South Florida much longer. Many of these stunning 192 priceless artifacts are from royal tombs, including spectacular objects that belonged to noble Andean lords, and have never-been-seen before out of Peru.

In this enthralling immersive experience, guests are able to unravel the mysteries of Andean cosmology and admire the sophistication of Andean artists while sounds of roaring jaguars, screaming macaws, and torrential rainfall surround them.

Visitors have marveled at the feats of engineering that sheltered a truly spiritual civilization and the ornate riches they once cherished. Nestled in a cloud forest, the Incas created an empire of architectural prowess and astounding riches, protected by the towering peaks of the Andes, unseen from below.

Rivaled only by Ancient Egypt in longevity and by the Roman Empire in engineering, Andean societies dominated a substantial segment of South America for over 3,000 years.

A special VR expedition of Machu Picchu takes this exhibition to the next level. Breathtaking virtual reality vistas of the mythical landmark, without any humans present, are a passageway for museum guests. Cinematic chairs enhance this VR experience with additional surprise effects that will even have you tasting the fresh mountain air of the Andes!
